TECHNICAL SKILLS

- Analytical Thinking & Problem-Solving abilities
- Equipment Maintenance
- Proficient in Microsoft Office Word, Excel PowerPoint etc.
- Fault Isolation and Troubleshooting
- Safety Process & Procedure
- Windows & LINUX
- Proficient in programming languages Java, python
- Excellent skills in machinery tools for milling, turning, bending, etc.
- Familiar with Circuit design, troubleshooting, testing Production
- Troubleshooting Server and server Health Checks Batch/Job
- Monitoring - Netcool, prognosis, Vital Signs, OIP Dashboard, splunk etc.
- Change & Transition Support
- SIT/UAT
- Root Cause & Log Analysis
- Oracle SQL, HeidiSQL etc.

WORK EXPERIENCE

Associate systems application support analyst

Visa Inc. : 2024 - Current

- Develop and support automation within HP Nonstop (Tandem) environments using TACL and Outlook integration, reducing repetitive operational effort and improving reporting consistency.
- Designed and deployed a Tandem macro-based ATM Status Check Automation across 16 client environments, automating status collection, formatting, and email distribution.
- Reduced ATM status validation from approximately 10-15 minutes per manual run to near real-time reporting, recovering about 30-45 minutes during relevant SW2V maintenance and transition activities.
- Implement secure workflows in XYGATE-controlled Tandem environments and automate daily audit and monitoring checks to improve execution consistency and reduce human error.
- Support mission-critical payment processing/DPS environments through monitoring, incident investigation, troubleshooting, system validation, scheduled changes, and transition activities.
- Monitor platform health using Netcool, Prognosis, Vital Signs, OIP dashboards, and log analysis; manage incident escalation through ITIL/ServiceNow processes.
- Coordinate internal/external incident bridges, communicate client and business impact, and perform L 1/L2 triage with Operations, Coverage, and Application Support teams.
- Took ownership of incidents through resolution, balancing workload and priorities independently.
- Provided client-focused support with strong communication skills, engaging stakeholders across all levels.

Application production support (L2)

DBS Asia Hub : 2023/06 - 2024/01

- Conducted server health checks and monitoring to ensure optimal performance.
- Provided day-to-day support for production incidents and addressed inquiries from business users, operational staff, and customers via the Contact Centre.
- Proficient in Linux operations and management.
- Supported CR (Change Request) processes using the CARA deployment tool.
- Managed tasks and projects within JIRA, ensuring streamlined operations.
- Provided assistance for System Integration Testing (SIT) and User Acceptance Testing (UAT) procedures.
- Utilized HeidiSQL and Oracle SQL for database management and queries.
- Performed daily monitoring and troubleshooting of server batches and jobs for seamless operation.
- Developed and implemented Shell scripts for various operational needs.
- Managed incidents and problems on a 24-hour rotational schedule, ensuring timely resolution.
- Experienced in IBM monitoring tool.
- Raised and monitored Blackout request for special handling.
- Demonstrated proficiency in handling problems efficiently and ensuring timely resolutions.
- JBOSS monitoring and restarting if required.
- Housekeeping server storage
- Raising and monitoring DR Flip/ Vmotion request for servers
- Monitoring and handling Daily, Monthly and Yearly batch jobs.
- Automating manual jobs to reduce daily workload and to avoid human error.

SOFT SKILLS

- Documentation & report writing
- Teamwork & interpersonal Skills
- Flexibility & Adaptability Creative Thinking & Decision Making
- Ability to work under pressure.
- Excellent knowledge in Creo, Solidworks, Repetier Host
- familiar with anaconda data science platform.

SELECTED AUTOMATIONS

- ATM Status Check Automation -HP Nonstop (Tandem), TACL, Outlook integration- automated status collection, formatting, and reporting for ATM
- Daily Audit & Monitoring Automation - converted repetitive operational checks into automation to reduce manual effort, improve consistency, and minimize human error.
- Operational Shell Automation - developed shell scripts to automate manual operational jobs to reduce daily workload
- Python Product Testing- applied Python in a product-testing project alongside structured troubleshooting and failure analysis.

EDUCATION

- **ITIL® 4 Foundation**
2026
(AXELOS / PeopleCert)
- **Teesside University, UK**
2024
Bachelors
Cybersecurity and Networks
- **Temasek Polytechnic**
April 2017- 2020
Diploma
mechatronics

Driving Licenses

- Singapore Class 3 Driving License (Manual/Automatic)
- Singapore Class 2A Motorcycle License

Failure Analyst

Micron Semiconductor Asia PTE Ltd, Singapore
2021/02-2023

- Successfully executed a product testing project utilizing Python, demonstrating proficiency in its application.
- Employed critical thinking skills to deconstruct complex problems, evaluate multiple solutions, and make informed decisions.
- Managed deviation reports in Jira, ensuring effective tracking and monitoring of issues.
- Exemplified respect, friendliness, and a proactive attitude, consistently offering support wherever necessary.
- Oversaw and organized knowledge transfer across teams by maintaining Confluence and SharePoint platforms.
- Possesses fundamental knowledge of Linux systems, contributing to basic operational tasks.
- Handled and monitored Statistical Process Control (SPC) methods, ensuring adherence to quality standards.

Student Internship Program- Robotic and Automation Centre Temasek Polytechnic, Singapore

2019/10 - 2020/03

- Contributed to various in-house projects by providing valuable assistance and support.
- Acquired comprehensive understanding of Workplace Health & Safety practices, specializing in 6S and Behavioral Based Safety methodologies.
- Cultivated adept troubleshooting skills through hands-on experience and practical application.
- Expanded proficiency in software installation and maintenance, enhancing knowledge base in this domain.
- Attained foundational knowledge in Solidworks, Arduino programming, and Visual Studio, gaining a basic understanding during practical learning opportunities.

PART-TIME STAFF - GRAND HYATT ,Singapore

2017/05 - 2020/03

- Developed teamwork skills & provided good customer service.
- Works long hour and continuous shifts.
- Showed strong teamwork and cooperation with other employees.

SELECTED PERSONAL PROJECTS

OTT Tracker | AI-Assisted Full-Stack Web Application | otttracker.in

- Built a full-stack OTT tracking website using React, FastAPI, PostgreSQL, Redis, and Docker.
- Leveraged AI-assisted development tools to accelerate implementation, automate TMDb metadata integration, and streamline OTT content workflows.
- Developed REST APIs, caching mechanisms, and monitoring capabilities to deliver a scalable and reliable user experience.

PhishBuddy Pro | AI/ML Cybersecurity Platform

- Built a Python-based cybersecurity application for phishing detection and simulation.
- Utilized machine learning algorithms and URL analysis
- Developed a GUI interface to support security testing and awareness training
